- No existing website or social pages found

Brand (taken from the business card)

- Black #121212 background
- Lime #D9EC1C (the paint stroke), warm yellow #F2C40F (the drips)

- White #FFFFFF, logo blue #1F4FA3 (MHK badge only)
- Fonts: Playfair Display italic (headings, like "Magdy Moussa (John)" on the card), Jost (body)

Folder layout

```

mhk painting/
README.md this file
website/ everything that gets deployed
index.html the whole site (one file, inline CSS + JS)
img/ job photos, compressed to WebP
.vercelignore stops .env files ever being uploaded
.vercel/ links this folder to the Vercel project (not in git)
docs/
original-plan.md the first plan
website-review.md the 6.5/10 review and what was fixed
photos/originals/ unedited job photos (local only, not in git)

```

How to update the site

1. Edit website/index.html (or ask Claude to).
2. Preview: open website/index.html in a browser, or run `python3 -m http.server 8765 --directory website` and go to `http://localhost:8765`.
3. Denlov from the website folder:

```
cd "website" && npx vercel deploy --prod --yes
```

4. Commit and push the change to GitHub.

Privacy decisions

- House number on the letterbox is blurred in `driveway-finished.webp`.
- Date stamps cropped off the interior photos.
- Ceiling photo (hanging wires, stain) left off the site on purpose.
- `realestate.com.au` listing photos not used (they belong to the agents). Client street addresses not published, suburbs only.
- Unedited originals stay in `photos/originals/`, which git ignores.

To do

- ☐ Show John the site and get his OK
- ☐ Get finished "after" shots and before/after pairs from John
- ☐ Confirm he still has every review at 5 stars (the site says so)
- ☐ Click the licence check link once to make sure it works
- ☒ Domain `mhkpainting.com.au` bought and connected to Vercel
- ☐ Re-take a photo of the business card for this folder (the original upload expired)
